

Burrows Family Practice, Inc.

Deductible Fee Schedule

Burrows Family Practice requires a portion of your annual deductible to be paid up front at the time of your office visit.

We have implemented this to help patients pay a portion of their bill up front rather than getting stuck with a larger bill later on- the amount that is paid up-front goes toward YOUR BILL, and will show on your statement that is bill to you once your office visit is processed through your insurance plan.

If your Individual Deductible or Family Deductible has been fulfilled for the current year, we will not collect any deductible up front at the time of your office visit.

Please note that we only collect deductibles up front for PPO patients that have \$0.00 copays through their insurance plan for primary care visits and annual deductible higher than \$200.00.

The amounts accumulated Year to Date for deductibles are verified the day before your visit at Burrows Family Practice for every visit.

Below defines the times when deductibles will be collected.
